Education

LIBERTY UNIVERSITY, Lynchburg VA

GPA: --

In-progress Majors: BS Computer Science (General)

Relevant Coursework: Introduction to Computer Science, Advanced C++, Intro to Discrete Mathematics, Technical Communication.

JUDSON COLLEGE, Wake Forest, NC – HS Dual Enrollment

GPA: 4.0

Relevant Coursework: Communications, English Composition 1 & 2

WAKE TECH COMMUNITY COLLEGE, Raleigh, NC – HS Dual Enrollment

GPA: 4.0

Relevant Coursework: Calculus 1 & 2, Physics 1 (calculus based).

Skills – by Summer 2027

Rust Programming Language, C++, Bevy Game Engine, ECS frameworks, Local-host Server-client Multiplayer Game Development, Code-generating AI, Blender (proficient modeler, beginner animator).

Extracurricular

PROJECTS

Biological Virus Simulation: I wrote a very basic simulation of how a virus spreads through a crowd, being inspired by an experiment in my Anatomy class during High School. It was mainly a curiosity project to help me learn the Rust Programming language.

Hexatower: Created a server-client multiplayer video game without the use of code-generating AI. I am the sole developer and artist; however, external libraries were utilized where appropriate. More information is posted on this website: oliverpierce.com.

Interests: I'm interested in solving problems involving mass computation by writing performance-oriented code. I'm particularly excited about simulations and digital twins (physics or otherwise), machine learning, and distributed systems.

Awards

- Academic Honors Scholar at Liberty University 2026 - 2030
- Eagle Scout in 2024 with Scouts of America.
- 2025 National Eagle Scout Project of the Year Council Semi-finalist
- As a Senator, Passed AI Legislation at 2025 TeenPact Congress
